

alloclæ™ Structural Adipose Filler | Revive

BEYOND CONVENTIONAL.
UNPRECEDENTED POTENTIAL.

THE *FUTURE* OF BODY CONTOURING HAS ARRIVED.

STRUCTURAL ADIPOSE TISSUE

FILLING THE DEMAND FOR INNOVATION

DESPITE THE RISE OF AESTHETIC TREATMENTS, MANY PATIENTS ARE STILL SEARCHING FOR SOLUTIONS FOR BODY CONTOURING.

- Patients are seeking natural alternatives to surgery and fillers.
- Until now, the only tools available to physicians have been fat transfer,
- hyaluronic acid fillers, and biostimulators.
- Treatments like GLP-1 are increasing the demand for a targeted solution
- to restore volume after weight loss.

IN A NEWBEAUTY® SURVEY OF MORE THAN 1,500 WOMEN:

74% want to contour or improve their shape despite diet and exercise.

84% are interested in treatments that restore volume, and enhance shape, naturally.

60% of patients who have lost weight identify buttocks and breast as their biggest areas of concern.

NEWBEAUTY® MEDICAL AESTHETICS CONSUMER STUDY MARCH 2025

WHAT IF YOU COULD OFFER PATIENTS A POWERFUL, NATURAL BODY CONTOURING SOLUTION WITHOUT SURGERY?

FINALLY, THE PROCEDURE GAP IS FILLED.

THE NEXT EVOLUTION OF BODY CONTOURING HAS ARRIVED.

TARGETED. NATURAL. LASTING.

CORE BENEFITS OF ALLOCLAE

01. First structural adipose tissue designed for body contouring to be used anywhere fat exist

02. Composed of intact adipocytes and naturally occurring extracellular matrix (ECM)

03. Provides immediate volume, cushioning, and support

04. Arrives ready to use, in-office or operating room

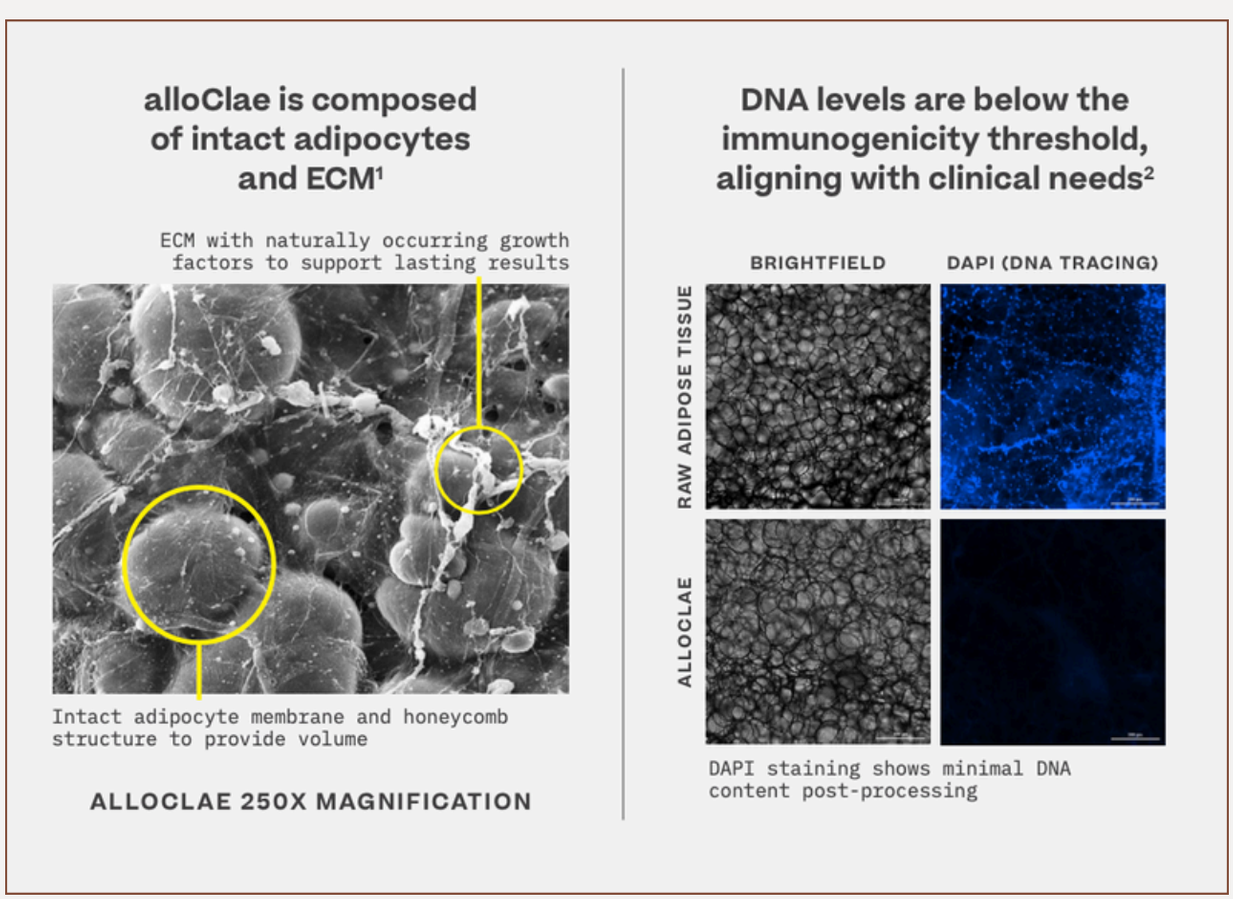

05. Shelf-stable; 12.5 cc per container

TRANSFORMATIVE SOLUTION. SUPPORTED BY SCIENCE.

ALLOCLAE IS STERILIZED DONOR DERIVED ADIPOSE TISSUE

A GROUNDBREAKING APPROACH TO PROCESSING ADIPOSE TISSUE:

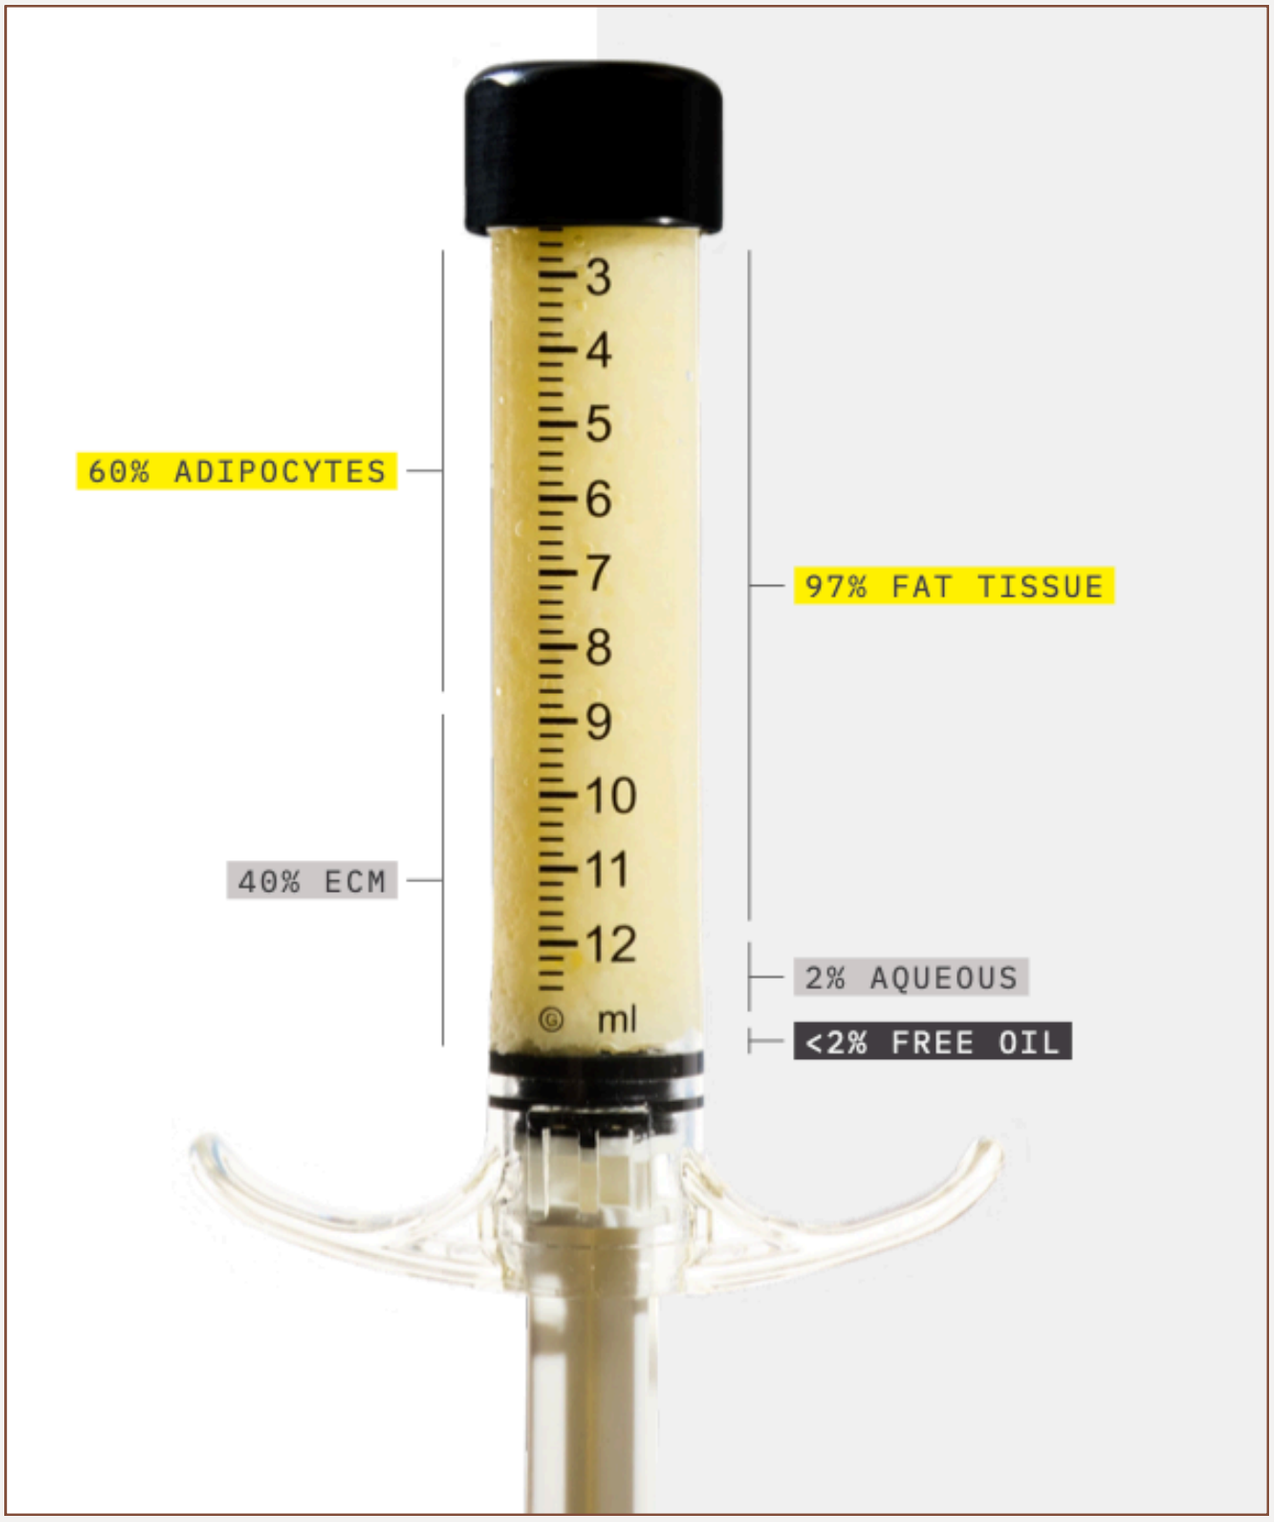

- Retains the innate 3D honeycomb structure of the adipocytes to provide immediate volume at the application site
- Maintains extracellular matrix with naturally occurring growth factors, proteins and collagens for lasting results
- Terminally sterilizes the tissue to a sterility assurance level (SAL) of 10-6
- Reduces free oil fraction to <2%; minimizing the risk of oil cysts
- Minimizes DNA content, reducing the immunogenic response

GROUNDBREAKING TECHNOLOGY: UNIQUE COMPOSITION OF ADIPOCYTES + ECM

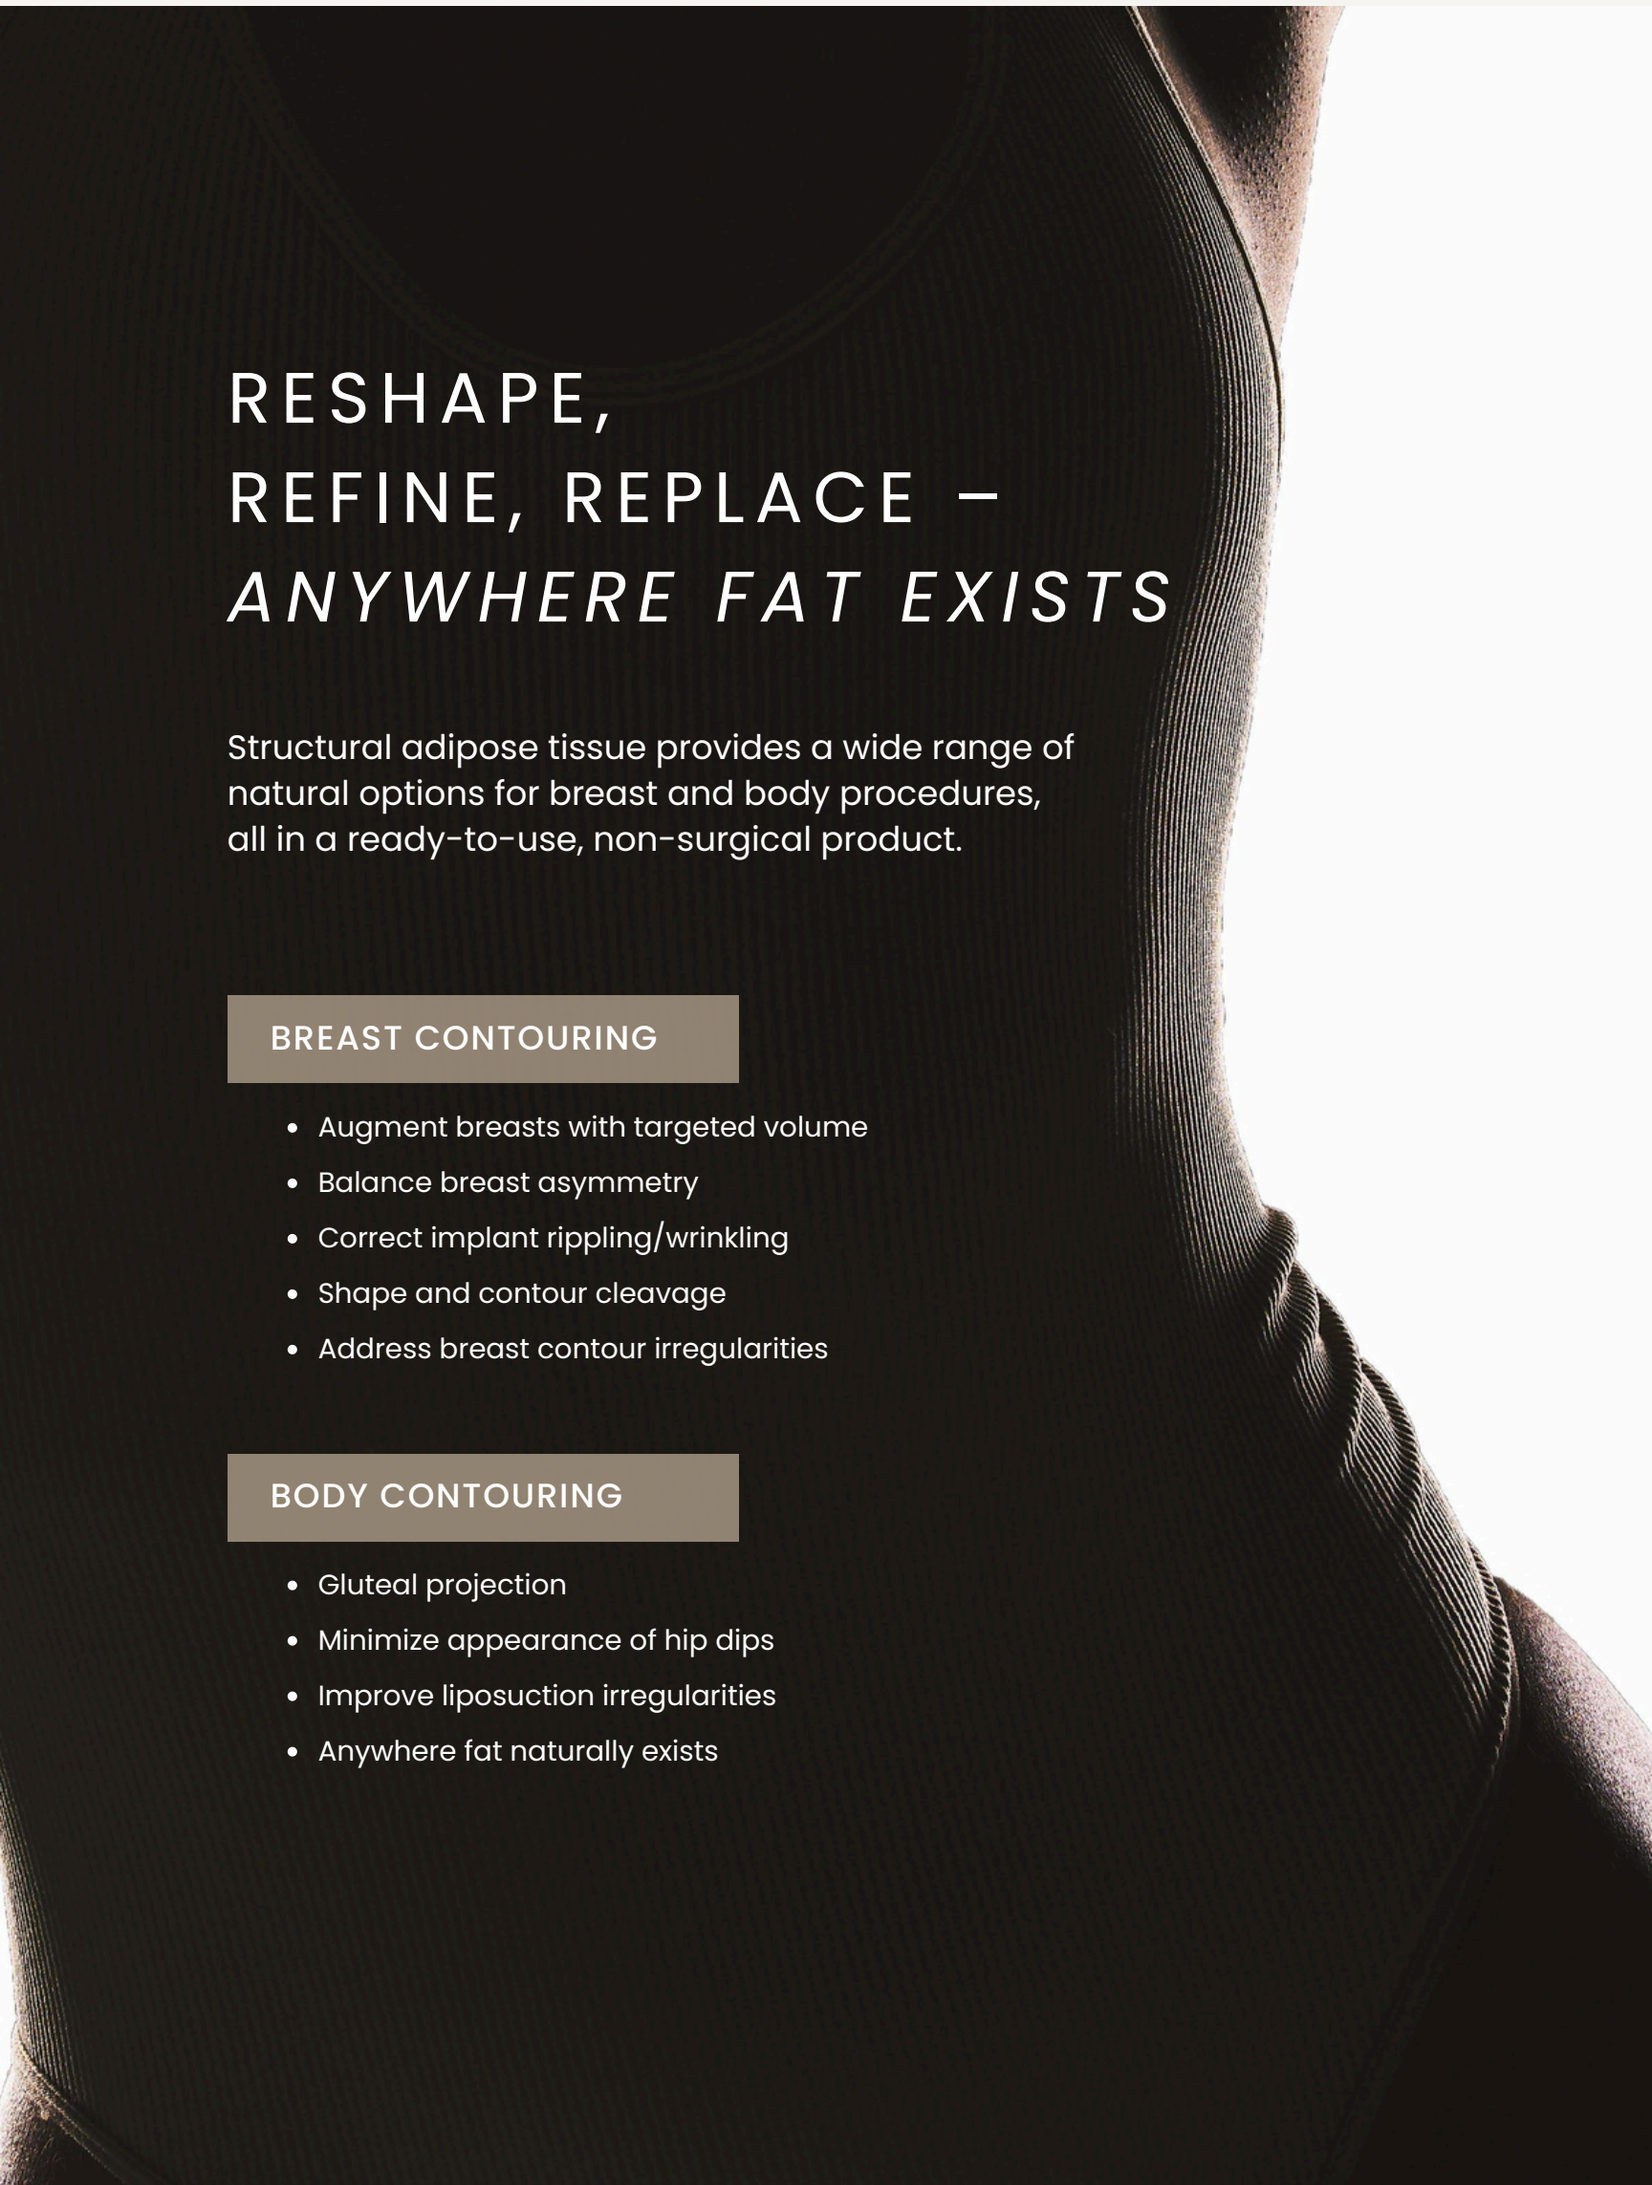

LEVELING UP IN BODY CONTOURING WITH ALLOCLAE

ALLOCLAE IS A GROUNDBREAKING READY-TO-USE SOLUTION FOR ADDING VOLUME ANYWHERE FAT EXISTS.

TARGETED. NATURAL. LASTING.

- Provides immediate and targeted **cushioning, volume and support**
- Structural adipose tissue for **natural, lasting results**
- May be applied **anywhere fat tissue naturally exists**
- **Non-surgical option** ideal for patients who prefer to avoid surgery or with insufficient fat to harvest

RESHAPE, REFINE, REPLACE – *ANYWHERE FAT EXISTS*

Structural adipose tissue provides a wide range of natural options for breast and body procedures, all in a ready-to-use, non-surgical product.

BREAST CONTOURING

- Augment breasts with targeted volume
- Balance breast asymmetry
- Correct implant rippling/wrinkling
- Shape and contour cleavage
- Address breast contour irregularities

BODY CONTOURING

- Gluteal projection
- Minimize appearance of hip dips
- Improve liposuction irregularities
- Anywhere fat naturally exists

A NATURAL FIT FOR YOUR PRACTICE AND PATIENTS

CONVENIENT FOR PRACTICES

- Ready-to-use product
- Shelf-stable; 12.5 cc per container
- Versatile cosmetic use
- Time efficient for practices
- In-office or operating room procedures

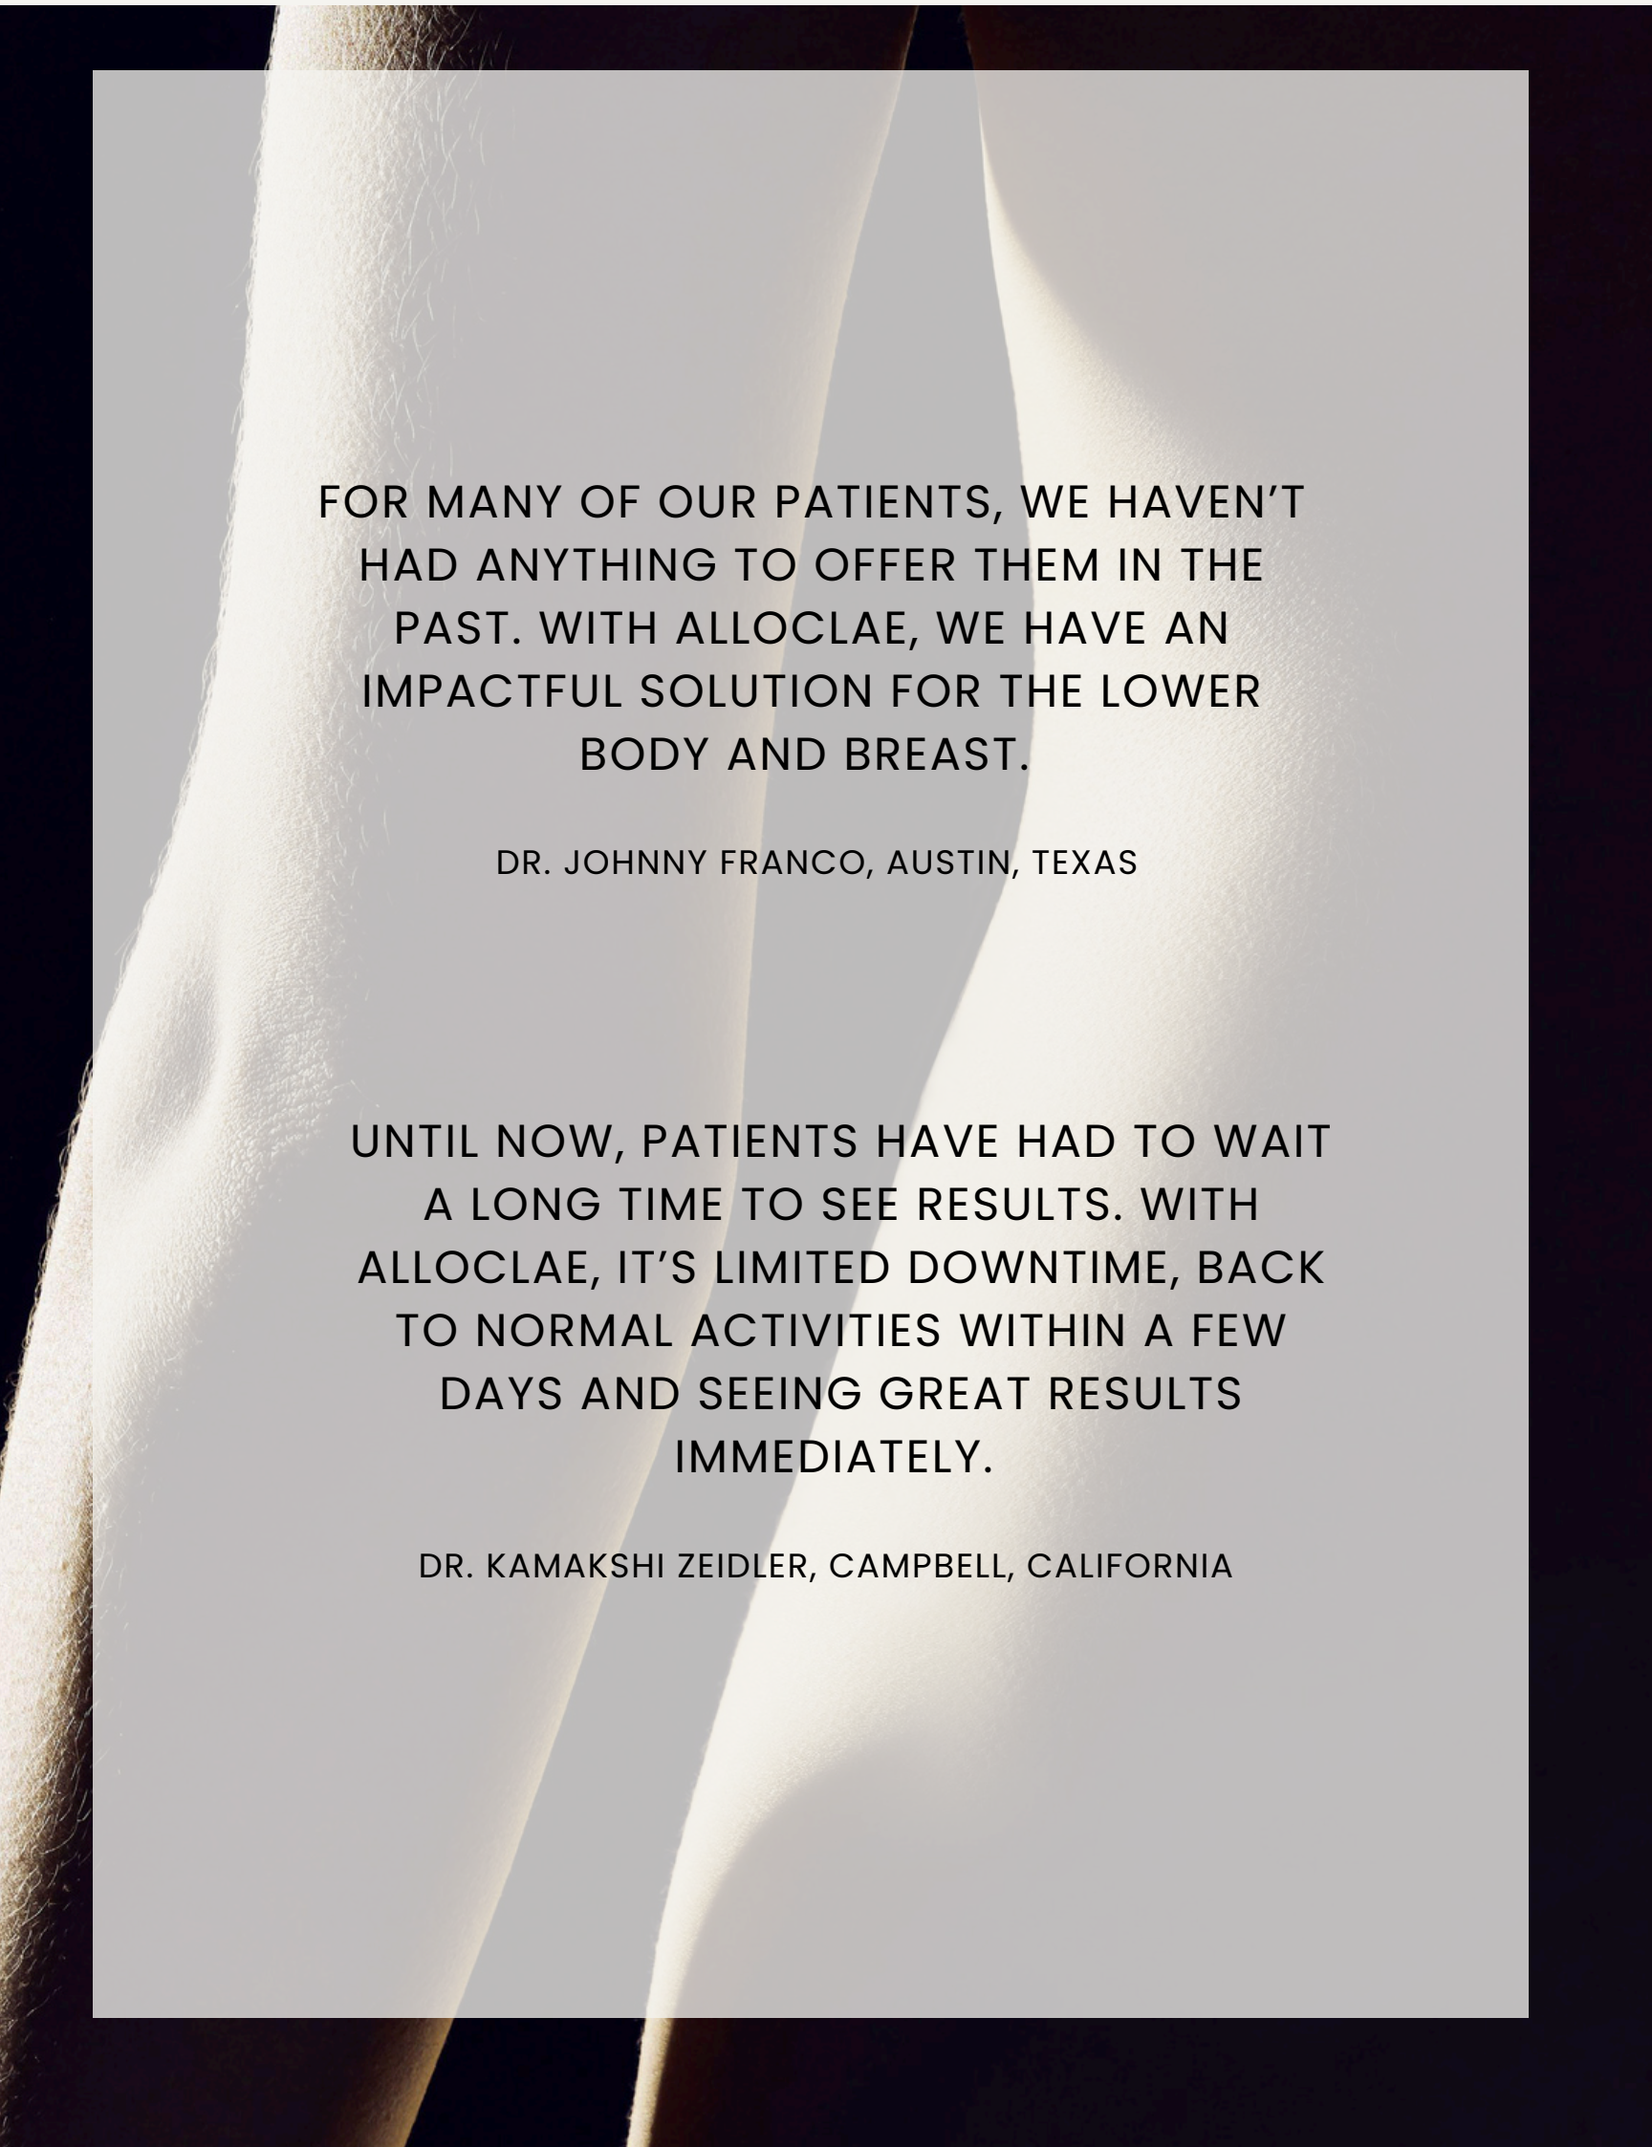

CONVENIENT FOR PATIENTS

- Non-surgical solution
- Immediate results
- Little downtime
- Any area requiring volume where fat exists

NOTHING SUPPORTS LIKE ALLOCLAE

Revive and Tiger Aesthetics wants to ensure you have everything you need – from staff training and support to engaging marketing materials.
Ask your Revive rep for any materials you may need.

FOR MANY OF OUR PATIENTS, WE HAVEN'T HAD ANYTHING TO OFFER THEM IN THE PAST. WITH ALLOCLAE, WE HAVE AN IMPACTFUL SOLUTION FOR THE LOWER BODY AND BREAST.

DR. JOHNNY FRANCO, AUSTIN, TEXAS

UNTIL NOW, PATIENTS HAVE HAD TO WAIT A LONG TIME TO SEE RESULTS. WITH ALLOCLAE, IT'S LIMITED DOWNTIME, BACK TO NORMAL ACTIVITIES WITHIN A FEW DAYS AND SEEING GREAT RESULTS IMMEDIATELY.

DR. KAMAKSHI ZEIDLER, CAMPBELL, CALIFORNIA

WELCOME TO THE FUTURE OF BODY CONTOURING

TARGETED. NATURAL. LASTING.

Differentiate your practice and introduce your patients to the next evolution of body contouring.

- First of its kind structural adipose tissue
- Non-surgical solution
- Immediate, targeted volume
- Lasting, natural results

alloClae is intended to be applied subcutaneously in localized areas of the body to provide cushioning and support to the patient's body where adipose tissue naturally exists. alloClae does not contain viable cells, and has no systemic effect, and is not dependent upon the metabolic activity of living cells for its primary function. This allograft is intended for single patient use ONLY. Human tissue shall not be offered or dispensed for veterinary use. alloClaeTM and Tiger AestheticsTM are trademarks of Tiger Aesthetics Medical, LLC.
